

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Original) An improved building structural panel comprising:

a first member of stiff corrugated material;

an intermediate sheet of insulative material; and

a second member of stiff corrugated material, said corrugated members being bonded to opposite sides of said intermediate sheet.
2. (Original) An improved building structural panel according to claim 1 wherein said corrugated members are formed from plastics material.
3. (Original) An improved building construction panel according to claim 1 wherein: said corrugated members are formed from wood pulp product.
4. (Canceled)
5. (Original) An improved building construction panel according to claim 1 wherein said corrugated members are bonded to said intermediate sheet with the corrugations running parallel to each other.
6. (Original) An improved building construction panel according to claim 1 wherein said corrugated members are coated with a fungicide.
7. (Original) An improved building construction panel according to claim 1 wherein said corrugated members are coated with a fire retardant material.
8. (Original) An improved building construction panel according to claim 1 wherein

said corrugated members are coated with a mold defeating material.

9. (Original) An improved building construction panel according to claim 1 wherein
said corrugated members are coated with a resilient material to promote rebounding of
object striking said panel

10. (Twice Amended) An improved building construction panel according to claim 1
further comprising:

a layer of resilient material spanning the outer side of ~~the~~ either outer member.

11. (Original) An improved building construction panel according to claim 10 wherein
said resilient material is in the form of a fiber coating.

12. (Twice Amended) An improved building construction panel according to claim + 11
wherein

said resilient material closely adheres to the shape of ~~the~~ either outer member.

13. (Twice Amended) An improved building construction panel according to claim + 11
wherein

said resilient material spans the peaks of ~~the~~ either outer member.
